

Consent and Release Agreement

Microblading, Combination, Ombre, Color Correction/Coverup or Tattoo Removal, Permanent Eyeliner, Permanent Lip Color (Please encircle the type of service)

This form is designed to give information needed to make an informed choice of whether or not to undergo a Semi-permanent application. If you have any questions, please don't hesitate to ask.

Although these procedures are effective in most cases, no guarantee can be made that a specific client will benefit from the procedure.

Microblading is the process of inserting pigment into the dermal (first) layer of the skin and is a form of tattooing.

All instruments that enter the skin or come in contact with body fluids are sealed and sterilized before use and disposed of after use. Cross contamination guidelines are strictly adhered to.

Generally, the results are excellent. However, a perfect result is not a realistic expectation. It is usual to expect a touch-up after healing is completed.

Initially the color will appear much more vibrant or darker compared to the end result. Usually within 5-7 days the color will fade 40-50%, soften and look more natural. The pigment is semi-permanent and will fade over time and will likely need to be touched-up within 6 months for 2-3 years.
